Dear HR/Manager,

I am writing to apply for the Software Developer position at your company. As a recent graduate in Management Information Systems from SETEC Institute, with hands-on experience in software development, I am excited about the opportunity to join your team and contribute to your goals.

At GrepTech Co., Ltd, I worked as a System Software Developer, creating web applications like booking and registration systems. I'm familiar with Laravel and PHP. I can also use VueJs, React, jquery, Flask, and WordPress, and languages such as HTML, CSS, Javascript, SQL, C++, C#, Java, PHP and Python to build reliable systems. I also enjoy learning new technologies like Docker and REST APIs, which help me improve my work.

Before that, I worked with Ecamshopping as part of the Digital Marketing Team, where I managed products on the website, designed banners and posters, and trained new staff. These roles taught me how to combine creativity with problem-solving to meet team goals.

In my free time, I've worked on many personal projects related to web development and learned new courses. These projects allowed me to improve my skills and take on challenges independently.

I believe my skills and dedication make me a great fit for this role. I'm hardworking, eager to learn, and excited to contribute to your success.

Thank you for considering my application. I'd love the chance to discuss how I can help your team. Please feel free to contact me at 081 512 188 or daramony.ydm@gmail.com

Sincerely,

Daramony Yem

GrepTech™

JOB RECOMMENDATION

To Whom It May Concern,

This is to certify that Mr. **Yem Daramony** has been employed by **Grep Tech (Cambodia) Co., Ltd.** in the Infrastructure Division as a **Full Stack Web Application Developer** from January 4, 2023, to November 23, 2024.
